## Evening Brief

Date: Tuesday, Aug 1 2017

---

### Weather Summary

#### \*\*\* Near Record Breaking Heat Western Areas This Week \*\*\*

Strong high pressure will build across Nevada through this week, bringing increasingly hot temperatures to most of the area, particularly western Nevada and portions of southwest Idaho. Temperatures will be closer to normal across far southern portions of the Great Basin where lingering moisture will result in some clouds and afternoon thunderstorms across the higher terrain.

A **High Risk** has been issued for much of this week for areas of western and northern Nevada that will see near record heat and critically dry relative humidity.

---

### Preparedness Levels

Great Basin	3
National	4

---

#### Great Basin Fire Activity (from Irwin): Light Activity

**New Fires and Acres: 17 fires for 442.6 acres; 546 acres large fire growth; 2 new large fires**

---

### Resources:

- Crews: 14 T1 IHCs in GB: 12 committed, 1 R&R, 1 available.
- GBCC has committed an estimated 72 + type 3, 4, 6 engines.
- 1-T1 and 5-T2 helicopters are available in GACC.

---

### Great Basin Fire Potential Summary

Fuels continue to dry out across much of the region, as we are several days into strong high pressure suppressing monsoonal activity. Lighter fuels, represented by 10-hr FM have, and will continue to see the most rapid drying over the next few days.

ERC's remain critical over much of Idaho, and will only continue to dry out further this week during the upcoming heatwave. Fire danger remains elevated across far western and northern portions of Nevada as well, with the rapid drying of lighter fuels.

Sagebrush live fuel moisture, which has a much slower response time to short term precipitation, has been on a rapid downward trend the past few weeks in most areas, finally reaching near to even below normal mid-summer levels across the northern and western portions of the Great Basin. Sagebrush live fuel moisture across Central NV/UT has dropped significantly to below normal and in some areas is approaching record lows.

Great Basin  
Coordination Center

We have issued a Great Basin **Fuels and Fire Behavior Advisory for Nevada, Idaho and Utah**, available at the following link:
